Conditional terrain stress — review candidate
Sector: azimuth 135–180°, zenith 40–55°; × denotes no stationarity certificate
Sector residual at fixed original field
Original screen
All covered directions
RMS log residual
Assumed peak terrain-height stress (%)
Sector residual after finite-budget refit
RMS log residual
Assumed peak terrain-height stress (%)
Field change relative to matching zero
Relative field norm change (%)
Assumed peak terrain-height stress (%)
Refit stationarity diagnostic
Projected-gradient infinity norm
Assumed peak terrain-height stress (%)
